

Class

Robotics

This class takes children on an exciting journey into robotics and programming through immersive, hands-on activities. They will explore different types of robots, delve into basic electronics, and master programming by constructing their own robots using advanced kits.

Additionally, they'll discover the power of sensors, sharpen their problem-solving skills, collaborate effectively in teams, and apply their knowledge to real-world scenarios. This program not only fosters essential STEM skills but also sparks creativity and innovation.
